FLAMINGOS ARE COMING

FLAMINGOS SIGHTED!

US Fish & Wildlife Services notified WHBC of an upcoming event in May where a rare species, "Plasticus Rosarius Flamingus," is expected to gather on the front lawns of Washington Heights residents.

These flocks will appear only for the month of May. Please be on the lookout for these birds, and if you see them **DO NOT APPROACH**, government authorities say they only respond to trained handlers. However, some of our New Heights youth are working through their training and will be able to collect and move them.

Where

Near homes that are playful and have good-natured residents

Prevention

Experts are encouraging residents to purchase Anti-Flocking Insurance to ensure their property remains flamingo free

Endangered

Plasticus Rosarius Flamingus are a delicate and very endangered species. We are asking that you do not damage or deface these birds in any way. Left alone, they will fly away in 24 hours.

NO, BUT SERIOUSLY...

While students are expected to raise their own funds; this is an opportunity for us to make sure any unexpected costs or projects are covered for Nicaragua and even future mission trips! Your support will have a lasting impact for years to come!

Nicaragua Team learning Spanish songs

HOW IT WORKS

Please scan the QR code to select a first and second choice landing spot for a group of pink flamingos. These spots should belong to a friend who is willing to host the flock for around 24 hours. Trained flamingo wranglers will deliver the birds and move them to the next location the following evening.

INSURANCE COVERAGE

If you are concerned about your yard or neighbors, you can buy an insurance policy to cover your yard if your home is chosen as a landing zone. Options include a week or a month of coverage. If your first choice for flocking is covered by insurance, the second choice will be used. Scan the QR Code to get your coverage today!
